Going to college in the US

Americans talk about 'going to college' even if the institution they attend is a university. To Americans the phrase 'going to university' sounds pretentious. Most colleges offer classes only for undergraduate students studying for a bachelor's degree. Community colleges offer two-year courses leading to an associate's degree, and afterwards students transfer to a different college or university to continue their studies. Universities are larger than colleges and also offer courses for graduate students who study in graduate school. Many universities also have separate professional schools, e.g. a medical school or a law school.

American high school students who want to study at a college or university have to take a standardized test e.g. the SAT (Scholastic Aptitude Test) or the ACT (American College Test). Students from countries outside the US who are not native speaker of English must also take the TOEFL (Test of English as a Foreign Language). Each college or university decides on the minimum score will accept though test scores are never the only factor taken into account. Students apply direct to between three and six colleges in their last year of high school. Each college has its own application form and most include a question for which the student must write an essay. The student also has to sent a transcript (an official list of all the subject studied and the grades received) and letters of reference.

There are many private colleges and universities but most students choose a public institution because the costs are lower. All universities charge tuition and students pay extra for room and board. Prices range from a few hundred dollars a

year to well over \$25 000 at some private colleges. Students whose families cannot afford to pay the full amount apply for financial aid. Many students receive a financial aid package which may be a combination of grants from the government, a scholarship, a student loan and work-study (= a part-time job at the college)

The most famous universities are those in the Ivy League, including Harvard and Yale, but many others have good reputations. Large universities often put most emphasis on research. Smaller colleges tend to concentrate on teaching undergraduates, and many students prefer these colleges because they offer smaller classes and more personal attention from teachers (: note at STUDENT LIFE)
